Upeksha Sandamini

Associate Software Quality Assurance Lead at Calcey Technologies
Kalutara District, Western Province, Sri Lanka

Summary

I am an Associate QA Lead Engineer and a Scrum Master with over 5 years of experience in several business domains including Banking and Finance, AFC, e-Wallets etc..

As a QA engineer, I have involved in the full software development life cycle from design to implementation and held many responsibilities including team leadership, requirement analysis, planning and effort estimation, software security assurance, Test Plan preparation, test execution, project documentation etc.

Good communication skills developed by working with diverse teams - both local and foreign, and the professional client handling skills have added me more value as a QA engineer and a Project Coordinator.
